Work Experience

Coding Raja Technologies

June 2024 – July 2024

Web Development Intern

Remote

- ——— Completed the tasks given by the company ———
- ——— Used **HTML**, **CSS**, **JavaScript** for frontend development. ———

Projects

Fitness Tracker: A MERN stack fitness tracking web application

[Demo](#) — [Source Code](#)

- Developed a web application to monitor and log workouts and nutrition using the **MERN stack**: React.js for UI, Node.js for backend, and MongoDB for storage.
- Styled the application with **Tailwind CSS** for an intuitive and responsive design.
- Deployed the frontend on **Vercel** and the backend on **Render** for seamless performance.

Resume Builder Website: An interactive web application for creating resumes

[Source Code](#)

- Built using the **MERN stack**: React.js for UI, Node.js for backend, and MongoDB for storage.
- Designed the UI using **Tailwind CSS** for a clean and modern appearance.
- Enabled users to create, customize, and download resumes effortlessly.

Webinar Management System: A basic project for managing webinars

[Source Code](#)

- Developed using **Django** for backend development, with **HTML** and **CSS** for the UI and **SQLite** for data storage.
- Facilitated the management of webinars hosted in the college, including scheduling and participant tracking.
- Created as an introductory project to explore the capabilities of **Django**.

Technical Skills

Languages: JavaScript, Python, Java, C++

Backend: Node.js, Express.js, Django

Frontend: React, Next.js, TailwindCSS, HTML, CSS, Bootstrap

Databases: MongoDB, MySQL

Developer Tools: Postman, VS Code, GitHub

Honours and Awards

2nd Runner-Up at VCET Hackathon 24

October 2024

- Secured **2nd Runner-Up** position among 50+ teams in the flagship **VCET Hackathon 24**.
- Developed an innovative gamified supply chain system aimed at training delivery partners for Swiggy and Zomato, with leaderboards, coins, and voucher incentives.
- Presented a well-structured business model, receiving praise for creativity and scalability.

Algorithmic Competitions/Achievements

- Secured **2nd Runner-Up** in **VCET Hackathon 24**, where we developed a gamified supply chain system for delivery training.
- Presented a business model that impressed judges for its practical application and scalability.

Extra-Curricular Activities

Deputy Secretary of VCET Hackathon 2024: Contributed to the organization and execution of the event.
